Editorial	iii
Introductory Speech from Chairman of seminar	iv
Table of Contents	v

Miscellaneous Mathematics

Abdellah Salhi A Game Theory Framework for Clustering	1
Dodi Devianto Rare Event Model Simulation for Heavy Tailed Distribution	14
Efendi Simulation and Analysis of Mosquito Population Model Using MPP and MPPGH Model	20
Elfizar Tracking Person in Outdoor and Dynamic Environment	28
Hazmira Yozza , Maiyastri, Hardes Swastika Comparison of Hepatitis-A and Hepatitis-B Survival Function by using Life Table Survival Analysis	31
Monika Rianti Helmi The Maximal Ideal of Localization of Ring Polynomial Over Dedekind Domain	39
Rusli Hidayat, Susi Setiawani Heat Transfer Model of Hatching Eggs Process using Interface Boundary Condition	45
Syamsudhuha A Local Smoothing Strategy Multigrid Method for Stabilised Discretisations of Convection-Diffusion Problems	58
Wartono, M. Marizal Convergence of Modified Halley's Method Based on Contra Harmonic Mean	67
Yuslenita Muda Fuzzy on n-Banach Spaces	72

Education Mathematics

Denny Haris, Ratu Ilma Indra Putri Design Research in PMRI: Third Graders' Preliminary of Teaching and Learning About Area Measurement Through Traditional Handicraft	77
Kairuddin, Zulkardi The Indonesian's Road Transportations as the Contexts to Support Primary School Students Learning Number Operation	85

Násrullah, Zulkardi Using "BSR" as Traditional Game to Support Number Sense Development in Children's Strategies of Counting	94
Neni Mariana Birthday Cake Activity Structured Arrangement for Helping Children Determining Quantities	103
Rasiman Analysis of Critical Thinking Ability of Students of The RSBI Class in High School on Mathematics Problem Solving	114
Reni Wahyuni, Ratu Ilma Indra Putri Exploration Indonesian Traditional Games as Context in Learning Factor Numbers	120
Risnawati Learning Model ATI (Aptitude Treatment and Interaction) and QAIT (Quality, Appropriateness, Incentive, Time) in Mathematics Education	128
Rozi Fitriza Using Macromedia Flash in Improving Students Achievement and Learning Activities of Geometry at Grade IX of MTsN Sungayang Academic Year 2010/2011	136
Yenita Roza Problem in Teaching Mathematics at Elementary Schools (Case Identification from PMRI Workshop)	143
Yullys Helsa, Ratu Ilma Indra Putri Design Research in PMRI: Using Math Traditional Dance in Learning Symmetry for Grade Four of Primary School	147
Zaid Zainal Abidin Using Van Hiele-Based Interactive Visual Tool to Alleviate Level of Thinking in Geometry Among Secondary school Students in Parepare	156
Zubaidah Amir, MZ The Implementation of Mathematics Teaching with Open-ended Approach to UIN Suska Riau Mathematics Student's Ability of Mathematical Creative Thinking	164
<i>Ethno Mathematics</i>	
Mashadi Satuan Sukatan dan Pembelajaran Matematika	177
Mat Rofa Ismail Menerokai Etnomatematik Melayu-Islam : Teori Kombinatorik al-Khatib dalam 'Alam al-Hussab dan Raudah al-Hussab	185
Mohamad Zain Musa Tinjauan Tamadun CAM : Suatu Tantangan Baru	203
Mohammad Alinor bin Abdul Kadir	

Perkembangan Logik di India dan Pengaruhnya kepada Alam Melayu	211
Abdul Razak Salleh Batu Bersurat Terengganu : Perspektif Matematik	220
Salmawaty Arif Preliminary Study of Ethnomathematic Elements in Aceh	233
Shaharir b.M.Z Tiga Dasawarsa Pengalaman Menyembul Unsur Etnosains Matematik Rumpun Melayu	236
