

AIP Conference Proceedings, Volume 1554
Padjadjaran International Physics Symposium 2013 (PIPS-2013)
Contribution of Physics on Environmental and Energy Conservations
Table of Contents

Preface: Padjadjaran International Physics Symposium 2013 (PIPS 2013)	1
I. Made Joni and Camellia Panatarani	
Advisory Board	2
Organizing Committee	3
INVITED PAPERS	
Vibrational spectroscopy of organic thin films used for solar cells	5
Yukio Furukawa	
The frontier of high energy physics and the large hadron collider	9
Kalanand Mishra	
Hybrid solar cells of conjugated polymers metal-oxide nanocrystals blends; state of the art and future research challenges in Indonesia	12
Ayi Bahtiar	
Synthesis and dispersion of nanoparticles, and Indonesian graphite processing	20
I Made Joni, Camellia Panatarani, Darmawan Hidayat, Setianto, Bambang Mukti Wibawa, Anton Rianto, and Husni Thamrin	
Deep structure of Eastern part of Bandung Basin based on 2D resistivity structure	27
Asep Harja	
CONTRIBUTED PAPERS: 1. MATERIAL SCIENCES	
Preparation of binderless activated carbon monolith from pre-carbonization rubber wood sawdust by controlling of carbonization and activation condition	33
E. Taer, M. Deraman, R. Taslim, and Iwantono	
Adhesion strength of sputtered TiAlN-coated WC insert tool	38
Esmar Budi, M. Mohd. Razali, and A. R. Md. Nizam	
Relationships between tensile strength, morphology and crystallinity of treated kenaf bast fibers	42
H. Sosiati, Ar Rohim, Ma'arif, K. Triyana, and Harsojo	

Bis(1,2,5-thiadiazolo)-<i>p</i>-quinobis(1,3-dithiole) (BTQBT) templating effect on structure and performance of organic solar cells	47
Yasuhiro Iwasawa and Yukio Furukawa	
Synthesis of (Pb,Ni)-doped BiFeO₃ multiferroic systems via a sol-gel method and their magneto-electric properties	50
Retno Asih, Muhammad Gufron, and Darminto	
The precipitation synthesis of broad-spectrum UV absorber nanoceria	54
Iis Nurhasanah, Heri Sutanto, and Nurul Wahyu Puspaningrum	
Fabrications and characterizations of dye-sensitized solar cells (DSSCs) with sol-gel derived gel electrolytes	58
Wa Ode Sukmawati Arsyad, Herlin Pujiarti, Pardi Sampe Tola, Herman, and Rahmat Hidayat	
Structure and particle morphology characterization of La_{0.85}Ba_{0.15}Mn_(1-x)Ti_xO₃	62
Haniyah Nadhira, Budhy Kurniawan, Halimah Arifni, and Siti Ahmiatri	
Effects of nano anatase-rutile TiO₂ volume fraction with natural dye containing anthocyanin on the dye sensitized solar cell performance	66
S. Agustini, R. A. Wahyuono, D. Sawitri, and D. D. Risanti	
Composite electrodes of activated carbon derived from cassava peel and carbon nanotubes for supercapacitor applications	70
E. Taer, Iwantono, M. Yulita, R. Taslim, A. Subagio, Salomo, and M. Deraman	
Physical properties characterization of Porong Sidoarjo mud and its potentials as CO gas adsorbent materials	75
R. S. Mustopa, A. F. Adzima, M. K. Asy'ari, and D. D. Risanti	
Synthesis of silver nanosheets onto solid substrates by using seed-mediated growth method	79
Iwantono, E. Taer, A. A. Umar, and T. T. Saputrina	
Study of the stability coated and uncoated nanosilver colloid	83
Harsojo, Respitaningrum, Toto Afrianto, and Harini Sosiati	
Synthesis of lithium cobalt oxide using low-pressure spray pyrolysis	87
Darmawan Hidayat, I Made Joni, Setianto, Camellia Panatarani, and Kikuo Okuyama	
Analysis of CaCO₃ products from lime solution	90
Zaenal Arifin, Suminar Pratapa, Triwikantoro, and Darminto	
Carbon film deposition on SnO₂/Si(111) using DC unbalanced magnetron sputtering	93
A. S. Aji and Y. Darma
