

*AIP Conference Proceedings, Volume 1554*  
**Padjadjaran International Physics Symposium 2013 (PIPS-2013)**  
**Contribution of Physics on Environmental and Energy Conservations**  
**Table of Contents**

<b>Preface: Padjadjaran International Physics Symposium 2013 (PIPS 2013)</b> I. Made Joni and Camellia Panatarani	1
<b>Advisory Board</b>	2
<b>Organizing Committee</b>	3

**INVITED PAPERS**

<b>Vibrational spectroscopy of organic thin films used for solar cells</b> Yukio Furukawa	5
<b>The frontier of high energy physics and the large hadron collider</b> Kalanand Mishra	9
<b>Hybrid solar cells of conjugated polymers metal-oxide nanocrystals blends; state of the art and future research challenges in Indonesia</b> Ayi Bahtiar	12
<b>Synthesis and dispersion of nanoparticles, and Indonesian graphite processing</b> I Made Joni, Camellia Panatarani, Darmawan Hidayat, Setianto, Bambang Mukti Wibawa, Anton Rianto, and Husni Thamrin	20
<b>Deep structure of Eastern part of Bandung Basin based on 2D resistivity structure</b> Asep Harja	27

**CONTRIBUTED PAPERS: 1. MATERIAL SCIENCES**

<b>Preparation of binderless activated carbon monolith from pre-carbonization rubber wood sawdust by controlling of carbonization and activation condition</b> E. Taer, M. Deraman, R. Taslim, and Iwantono	33
<b>Adhesion strength of sputtered TiAlN-coated WC insert tool</b> Esmar Budi, M. Mohd. Razali, and A. R. Md. Nizam	38
<b>Relationships between tensile strength, morphology and crystallinity of treated kenaf bast fibers</b> H. Sosiati, Ar Rohim, Ma'arif, K. Triyana, and Harsojo	42

<b>Bis(1,2,5-thiadiazolo)-<i>p</i>-quinobis(1,3-dithiole) (BTQBT) templating effect on structure and performance of organic solar cells</b>	47
Yasuhiro Iwasawa and Yukio Furukawa	
<b>Synthesis of (Pb,Ni)-doped BiFeO<sub>3</sub> multiferroic systems via a sol-gel method and their magneto-electric properties</b>	50
Retno Asih, Muhammad Gufron, and Darminto	
<b>The precipitation synthesis of broad-spectrum UV absorber nanoceria</b>	54
Iis Nurhasanah, Heri Sutanto, and Nurul Wahyu Puspaningrum	
<b>Fabrications and characterizations of dye-sensitized solar cells (DSSCs) with sol-gel derived gel electrolytes</b>	58
Wa Ode Sukmawati Arsyad, Herlin Pujiarti, Pardi Sampe Tola, Herman, and Rahmat Hidayat	
<b>Structure and particle morphology characterization of La<sub>0.85</sub>Ba<sub>0.15</sub>Mn<sub>(1-x)</sub>Ti<sub>x</sub>O<sub>3</sub></b>	62
Haniyah Nadhira, Budhy Kurniawan, Halimah Arifni, and Siti Ahmiatri	
<b>Effects of nano anatase-rutile TiO<sub>2</sub> volume fraction with natural dye containing anthocyanin on the dye sensitized solar cell performance</b>	66
S. Agustini, R. A. Wahyuono, D. Sawitri, and D. D. Risanti	
<b>Composite electrodes of activated carbon derived from cassava peel and carbon nanotubes for supercapacitor applications</b>	70
E. Taer, Iwantono, M. Yulita, R. Taslim, A. Subagio, Salomo, and M. Deraman	
<b>Physical properties characterization of Porong Sidoarjo mud and its potentials as CO gas adsorbent materials</b>	75
R. S. Mustopa, A. F. Adzima, M. K. Asy'ari, and D. D. Risanti	
<b>Synthesis of silver nanosheets onto solid substrates by using seed-mediated growth method</b>	79
Iwantono, E. Taer, A. A. Umar, and T. T. Saputrina	
<b>Study of the stability coated and uncoated nanosilver colloid</b>	83
Harsojo, Respitaningrum, Toto Afrianto, and Harini Sosiati	
<b>Synthesis of lithium cobalt oxide using low-pressure spray pyrolysis</b>	87
Darmawan Hidayat, I Made Joni, Setianto, Camellia Panatarani, and Kikuo Okuyama	
<b>Analysis of CaCO<sub>3</sub> products from lime solution</b>	90
Zaenal Arifin, Suminar Pratapa, Triwikantoro, and Darminto	
<b>Carbon film deposition on SnO<sub>2</sub>/Si(111) using DC unbalanced magnetron sputtering</b>	93
A. S. Aji and Y. Darma
